## Funding, Community Support & Collaboration

Community Health Center is funded by donations from individuals, local businesses, community groups, private foundations and fundraising events. Additional support is received from public grants. Fees for services are provided by MassHealth, Medicare and private insurers. As an integral component in the region's health care delivery system, CHC collaborates with a number of partners including other community health centers, and other human service organizations. We are recognized for our extraordinary quality of care, and are grateful for a generous community that helps to make that possible.

*CHC services are provided on a sliding scale, if needed, based on income and family size. CHC receives HHS funding and has Federal Public Health Service (PHS) deemed status with respect to certain health or health-related claims, including medical malpractice claims, for itself and its covered individuals.*
